Jack, an enthusiastic first grader, is on a mission to help his friends stay safe and think safely by teaching them important safety lessons he learned from his mom. These life skills are simple, easy to remember, and can help children identify and respond to potentially dangerous behaviors and environments.

Jack Teaches His Friends to Be KidSafe is designed to help children remember necessary safety tools and to foster open discussion between parents and children. This is a positive and empowering book written for a child's level (Pre-k through second grade) with friendly illustrations. The proactive message is easy to understand and is useful for kids of all ages. It will increase children's confidence and develop the skills to act and/or react to keep themselves safer. When explained and implemented, KidSafe's six techniques become habit, so children instinctively make safer and smarter choices.

"The lessons this book teaches are priceless. I would recommend this book to any parent concerned about the safety of their child."

—Robyn Salk, Mother of two children

"This is the first book I've found which teaches early childhood safety skills on a level they can understand and use."

—Linda B. Harris, BS, MS, Director of Early Childhood

Sally Berenzweig, MEd, MA and **Cherie Benjoseph**, LCSW are the creators of KidSafe USA. The program teaches Personal Safety Education to children ages 4 to 11. *Jack Teaches His Friends to Be Kidsafe* is part of the curriculum for pre-k through 2nd grade. This is the first book in the KidSafe USA Safer and Smarter Choices Series. The next book, *My Body is Special*, will be available December 2008.
